

## Marcliff Flood Alleviation Scheme Update - November 2013

### Report of post scheme inspection

Dear Residents

We would like to update you in relation to the recently completed flood alleviation scheme in Marcliff.

We have carried out a post scheme inspection at Marcliff and have identified a small number of issues. These do not affect the current operation of the defences however we are proposing to undertake works early in the New Year to rectify these issues.

These works include the extension of the existing flood wall to tie into the high ground which will reduce the long term maintenance of the scheme.

Other works will include improved access and the provision of gates and a hard standing for the village pump. We will also provide access steps to allow the operation and maintenance of the flap valve.

These works are currently in the design stage and it is proposed that work will start on site late January / early February. We will keep you updated with the progress of these works and will ensure we minimise disruption to the village as the works progress.

If you would like to discuss these works in more detail please use the contact details below:
