Bidford on Avon PV5020 FTTP	Bidford on Avon - Harbour Close area
Bidford on Avon PV5030 FTTP	Bidford on Avon - Victoria Road area

To find out if you can get superfast broadband:

1. Check whether fibre broadband is available to you by entering your landline number or address into the [BT Broadband Availability Checker](#).

If fibre is available, either 'VDSL Range A & B' or 'WBC FTTP' will be listed in the 'Featured Products' column on the left hand side of the results table along with the maximum and minimum speeds you are likely to achieve.

Our [How to use the BT Broadband Availability Checker](#) web page includes clear and concise information on how to make sense of the Availability Checker results.

2. Remember, that **if fibre is available, you will need to order a fibre broadband package. You will not receive the upgraded service automatically.** To find an Internet Service Provider and a fibre broadband package that suits your needs, you can use a broadband comparison site such as:

[MoneySavingExpert.com](#)

[Broadbandchoices](#)

[Broadband Genie](#)

[Cable.co.uk](#)

What are the benefits?

Having access to faster broadband allows individuals, families, businesses and communities to:

- Browse the web faster
- Stream HD films, TV shows, games and videos without buffering slowing you down
- Talk face-to-face with friends and family using Skype, FaceTime or similar software
- Compete with other businesses in the increasingly competitive global marketplace

- Reduce workplace costs through remote working / working from home
- Make use of a whole host of other online opportunities that wouldn't otherwise be possible

Please Note: Even though your FTTC cabinet may have been upgraded, not every property connected to it is guaranteed to benefit due to some properties' distances from the cabinet and/or quality of copper connections. For more information see our [FAQs](#)
